No. Don't worry about it, I got it. It shows the proposed elevation of the proposed reclamation vs. original contours.

Was it the proposed crossings?

The one thing I want more than any is the two maps that show reclamation with reference lines on it, something like A-A' and B-B'. Then there was another that showed it in a side profile to demonstrate pre and post elevations. The side profile showed a ridiculous reclamation AOC for the floodplain compared to the existing/original elevation. I think I have everything else on hard copy except one email which I wish I still had from DNR-DFW, oh well. Thanks

Will go through all the stuff, we have on Friday. Also do you have the old hard copies of stuff? Let me know and will work on coping whatever you need.

Did I ever send you a CD with a bunch of the operations and reclamation plan maps that would have been more targeted towards SMCRA?

I am looking for two maps. One was a reclamation overview map that had two reference lines on it, something like A-A' and B-B'. Then there was another that showed it in a side profile to demonstrate pre and post elevations.

I lost these with the computer crash and am hoping to find them again.
